Magellan® Desktop Reader Series: MDR-3021AT

Magellan® Desktop Reader Series: MDR-3021AT

The MDR-3021AT Desktop Reader is designed especially for tag encoding purposes. With its clearly defined read/write area the process of issuing information to the selected tag becomes simple, quick and efficient. Most suitable for encoding tagged items in the Orthopedic Implant industry for tracking loan kits and sterile implants.

Features

- Low power ensures no interference in sensitive environments (Hospitals, Laboratories)
- Fast read/write capabilities
- Ergonomic design means many Tags can be issued quickly without interruption
- Linux based OS allows for powerful stand-alone operation
- Excellent connectivity with both USB and Ethernet interfaces
