Magellan® Desktop Reader Series: MDR-4330AT

Magellan® Desktop Reader Series: MDR-4330AT

The MDR-4330AT Reader provides a unique platform for users to accurately identify, track and count the movement of small valuable products. It brings superior 3-Dimensional read and write capability to a convenient and portable bench top reader.

This robust benchtop RFID tool will read tagged items in any orientation as well as when in densely packed containers. The upper surface is made of food grade non porous plastic which can be easily wiped clean from spills. The simplicity of the reader means no complex tuning or dificult setup procedures.

The reader is also fully shielded so that it can be placed on any surface including metal tables or shelving. It has a large read area and can read more than 750 tags in under 5 seconds.It is designed so it will only read and write to tags on top of the reader, thus eliminating accidental reading or encoding of other tags near the reader.

Features

Large 3D Read area

Sturdy design

Fast read/write capabilities

Easy to use

Linux based OS allows for powerful stand-alone operation

Excellent connectivity with both USB and Ethernet interfaces
