RFID Wine Inventory Management System

Wine WIM
Wine Inventory Management

Nowadays, more retailers arouse the needs to reduce operation cost and promote efficiency working method. Million Tech notices the need of those companies who manage **Wine Vault** themselves, and thus developed a set of cloud-based RFID Inventory Room Management System, to solve the difficulty of searching certain Wine from the vault, or to perform stock-take in Wine Vault or Shop. The application can be also fit for different products.

WIM – Systematic Cloud-Based Inventory Management for Wine

The WIM solution is an Easy-to-Use and Self-served Inventory Management System. The adoption of cloud server and well match of using the RFID Handheld Terminal creates better user experience, higher working efficiency, lower manual stock-taking errors and lower operation cost for managing inventory items.
